EXPERIENCE

Software Developer Intern

Feb 26 – Present

NOKIA

- Proposed and implemented a guided image capture interface to standardize input quality, reducing false positives/negatives caused by inconsistent field data
- Built a custom dataset for tower installation detection, including data collection, labelling, and augmentation under limited data constraints
- Fine-tuned a MobileNetV2 model with transfer learning, achieving 88% validation accuracy; addressed overfitting using augmentation and regularization techniques

Software Developer Intern

July 25 – Sept 25

4CPlus

- Fine Tuned various **Large Language Models (LLMs)** using LoRa method
- Used **MongoDB, and Hugging Face** Software Stack to build various AI applications
- Used **Git** for version control and followed **PR-based workflows**, code reviews, and clean commit practices.

Machine Learning and Gen AI Summer Trainee

Jun 24 – Aug 24

AI-SHALLA

- Gained hands-on experience in LLMs and Transformers using Python and Hugging Face.
- Fine-tuned large language models with techniques like LoRa, improving task-specific performance by 25%.
- Ranked 2nd among 70 trainees** based on assignments and project evaluation.

PROJECT WORK

- ECHOES (SNS WEB APP)** | (HTML, CSS, React.js, Node.js Tailwind, MongoDB) [\[Link\]](#) | [\[GitHub\]](#)
 - Implemented authentication & JWT authorization for secure user management.
 - Optimized database queries using **Indexing**, reducing query times and improving scalability for handling large datasets.
 - Enhanced REST API efficiency by implementing pagination, improving response times and reducing server load in larger dataset.
- Real Time Driver Inattention Detection and Alert Generation system(Python, TensorFlow)** [\[GitHub\]](#)
 - Fine Tuned **Efficient-Net B0** on a **labelled 6 class dataset** for driver attention analysis
 - Used probability outputs to compute safety score and improve reliability
 - Achieved **~90% Accuracy** with **~89% Recall Score**
- AI QuizBot | (Langchain, LoRa, Streamlit, Hugging Face, Python)** [\[GitHub\]](#)
 - Fine-tuned** the model using Dataset to increase the accuracy.
 - Applied **LoRa**, cutting **training time by 80%** and memory use significantly
 - Used **Langchain** to manage prompt flow and modular chaining for scalable logic.

EDUCATION

B. Tech in Information Technology, (2022-26)

CGPA: **8.13**

Maharaja Surajmal Institute of Technology, GGSIPU

12th Grade (PCMCs), St. Cecilia's Public School, 2021

PERCENTAGE: **96.6%**

10th Grade, St. Cecilia's Public School, 2019

PERCENTAGE: **96.8%**

SKILLS

Languages

C++, Python, JavaScript

Databases

MySQL, MongoDB

Tools & Frameworks

React.js, Git, Node.js, Express, Postman

Technical Skills

Data Structures and Algorithms (DSA), Object-Oriented Programming, Operating Systems, DBMS

ACHIEVEMENTS & CO-CURRICULAR

- Ranked **1st** – Byju's Interschool Aptitude Assessment, showcasing problem-solving skills.
- Ranked **2nd** in GenAI and machine learning training based on assigned score and project evaluation
